8. Choose the correct antonym for the given word: tolerant

(1) realistic

(2) merciless

(3) visible

(4) inflexible

เฉลยข้อ 2 และ 4

คำอธิบายของผู้ทรงคุณวุฒิ :

Tolerant refers to the ability to accept or endure opinions, behaviors, or beliefs that are different from one's own. It implies an openness and willingness to respect others, even if their views or actions are not aligned with one's own.

Merciless, on the other hand, describes a lack of compassion or forgiveness. It indicates a harsh and unforgiving attitude towards others, showing no sympathy or leniency.

In essence, tolerant involves understanding and accepting differences, whereas merciless involves a harsh, unfeeling attitude. The contrast between being accepting and showing no compassion highlights why they are considered antonyms.

Merciless: This term refers to a lack of compassion or forgiveness, which contrasts with the idea of being tolerant, as tolerance involves accepting and understanding others even if one might disagree with them. Mercilessness implies a harsh and unforgiving attitude, which is opposite to the acceptance associated with tolerance.

Inflexible: This term describes an unwillingness to adapt or change one's views or behavior.

Inflexibility contrasts with tolerance because tolerance often requires the ability to adapt or accommodate differing perspectives and behaviors. An inflexible person might be rigid in their beliefs or actions, showing little acceptance of others' differences.
